

## SAVISION UNVEILS VERSION 7.5 OF LIVE MAPS UNITY

**Amsterdam, the Netherlands – November 9th , 2015** – Savision, the market leader of IT Operations Intelligence, Business Service and Cloud Management solutions, today announced the availability of version 7.5 of Live Maps Unity. **Live Maps Unity** is a powerful, unifying solution for monitoring service health and performance, bringing IT and business together. Live Maps Unity integrates seamlessly with Microsoft System Center Operations Manager, Service Manager, and ServiceNow and smoothly integrates into your organizational processes for incident and change management.

The latest version provides significant enhancements to the current offering, making it the most powerful solution ever released by Savision. It enables users to exercise more control over their IT environments.

There are several new features added to **Live Maps Unity**, including:

- **Advanced Service Level Agreement Monitoring** - to enable operations teams and business Service Owners to receive proactive notifications when individual SLAs are in danger of not being met. Each service level agreement created by Live Maps Unity now has a System Center Operations Manager monitor associated with it. The monitor offers various levels of alerts, from Healthy to Warning to Critical, as the SLA approaches, and, if not corrected, ends with the Breach alert.
- **Brand New Web Portal** - Live Maps Unity can now be viewed on any mobile device with the new, responsive web portal. Completely Silverlight-free, the portal shows the health explorer, configure maintenance mode, and execute tasks for any System Center Operations Manager object.

“The features of the 7.5 version were inspired by the feedback we received from our customers,” said Dennis Rietvink, Co-Founder of Savision and VP of Product Management. “Our mission is to give them innovative and reliable solutions to manage their IT environments, so they can provide their own customers with the best service possible.”

**Live Maps Unity** comes with flexible licensing options. Savision’s best offer yet allows customers to choose either a perpetual or subscription license, depending on their available budget, as well as the length of time they would like to use Savision’s solutions.

Continuing to innovate after the 7.5 version of Live Maps Unity, Savision will be coming out with a brand new solution. A vendor-agnostic solution that will open up a new market for Savision, with the ability to support multiple platforms. Savision’s solutions will no longer be tied to only one vendor.

## About Savision

Savision is the market leader of IT Operations Intelligence, Business Service and Cloud Management solutions. The company's monitoring and visualizing capabilities bridge the gap between IT and business, by transforming IT data into predictive, actionable and relevant information about the entire cloud and datacenter infrastructure.

Savision's intuitive and customizable dashboards provide context for each business service. This results in preventing IT-related problems and business downtime, increasing overall organizational efficiency as well as reducing IT operational costs up to 20%.

Savision's solutions scale from small to medium businesses, government bodies as well as Fortune 500 companies operating in different fields and have been adopted by over 750 organizations worldwide.

Savision is a Dutch founded company headquartered in Amsterdam with offices in Dallas and Ottawa. For more information, visit [www.savision.com](http://www.savision.com)
