

## Video Microsoft MVPs unplugged at TechEd NA 2014

**Amsterdam – August 8<sup>th</sup>, 2014** - Savision, the market leader in Business Service and Cloud Management solutions for Microsoft System Center, interviewed several Microsoft Most Valuable Professionals (MVPs) at TechEd NA 2014 in Houston and asked Robert Butler, Cameron Fuller, Kevin Greene, Ahmed Nabil Mahmoud, Rick Heiges, Steve Buchanan and Colin Smith their opinion on the following topics:

- System Center & VMM
- Security Concerns in the Cloud
- The Future of IT
- Savision solutions

You can watch the video [here](#).

### **System Center & VMM**

Find out why the MVPs like VMM to be a "one-stop-shop" for the virtual environment, why they recommend System Center and VMM 2012 R2 into the regular suite for every Hyper-V deployment and what you can do with a solution like VMM 2012 R2.

### **Security Concerns in the Cloud**

Learn more about their thoughts on security concerns in the Cloud related to the Snowden issue, the adoption of the Cloud after the Snowden hype, the pushbacks and postponing of Cloud implementation, the ownership of the data of Public Clouds and the credibility of Cloud Providers.

### **The Future of IT**

The MVPs also give their view on enhancements in VMM; why they are hoping for an integration with Azure, new functionalities of the Cloud that we soon cannot live without, why people are moving slowly to the Cloud, the developments within the IT industry related to Cloud, the drive of organizations to move to the Cloud and translating business requirements into service monologues to get most out of IT.

### **Savision Solutions**

The MVPs also emphasize the Savision solutions; they discuss Cloud Reporter, Business Service Management for System Center, visualization, bringing data from OpsManager into dynamic dashboards and providing reports and SLA's for C-level management with Live Maps Unity.

### **About Savision**

Savision is the market leader in Business Service and Cloud Management solutions for Microsoft System Center. The company's monitoring and visualizing capabilities bridge the gap between IT and business, by transforming IT data into predictive, actionable and relevant information about the entire Cloud and datacenter infrastructure.

Savision's intuitive and customizable dashboards provide context for each business service. This results in preventing IT-related problems and business downtime, increasing overall organizational efficiency as well as reducing IT operational costs up to 20%.

Savision's solutions scale from small to medium businesses, government bodies as well as Fortune 500 companies operating in different fields and have been adopted by over 700 organizations worldwide.

Savision is a Dutch founded company headquartered in Amsterdam with offices in New York, Dallas and Ottawa. For more information, visit [www.savision.com](http://www.savision.com)
