

## SAVISION RELEASES FREE MOBILE-FRIENDLY HTML5 DASHBOARDING SOLUTION FOR MICROSOFT SYSTEM CENTER OPERATIONS MANAGER

**Amsterdam, The Netherlands – April 7<sup>th</sup>, 2015** – **Savision**, the market leader of Business Service and Cloud Management solutions for Microsoft System Center, announced today the release of their newest solution: **Dashboards by Savision**. Dashboards by Savision is a fast, free and modern, HTML5-based dashboarding tool for System Center Operations Manager. It allows IT professionals to view and respond to the state of their IT infrastructure on a desktop, tablet, or mobile phone.

Out of the box, the product comes with dashboards for core Microsoft applications such as Active Directory, SQL Server, and IIS. And, for IT professionals who want to build and customize their own dashboards, the product allows them to build their own visualizations right inside a web browser. With widgets like “Top N”, “Heat Map”, and “Web Page” IT professionals can ensure that the information they and their colleagues need about critical applications and hardware is available at their fingertips whenever and wherever they need it.

Dennis Rietvink, Savision co-founder and Vice President of Product Management stated, “**Dashboards by Savision** is the perfect addition to System Center Operations Manager. It takes all of the detailed performance and monitoring information collected by Operations Manager and quickly surfaces it in an intuitive manner. IT professionals can be up and running with their own custom dashboards in a matter of minutes.”

Savision CTO Rob Doucette added, “**Dashboards** is a terrific complement to our **Live Maps Unity** solution. **Live Maps Unity** allows IT departments to model business services, share status and SLA information with management, and rapidly respond to business critical issues and outages. **Dashboards** combines with **Live Maps Unity** to provide better insight into why availability issues occur and allows IT departments to be proactive rather than reactive.”

**Dashboards by Savision** is available in a premium version to all customers of Savision’s **Live Maps Unity** who have a current support and maintenance contract and as a free version to everyone else. The free version includes access to all the out-of-the-box dashboards as well as the ability to build one custom dashboard. Additional custom dashboards may be purchased online on a subscription basis.

**Dashboards by Savision** is available for immediate download from <http://www.savision.com/free-dashboards>
